KEI at a Glance

Business

Established with the vision of changing the landscape of the electrical cable & wire industry in India, KEI has been a leader in the cables and wires industry for over 40 years. With a sharp focus on quality and service, the Company has been a frontrunner in adopting latest business practices and innovations in technology to deliver maximum value to its customers. Over the years, KEI has carved a niche for itself in the market. Its superior quality and service resonates the trust that its customers have placed in the Company. Backed by state-of-the-art technology and infrastructure, KEI, today, has a vast product portfolio ranging EHV, HT, LT and specialized Power, Control and Instrumentation cables along with vast range of Rubber Cables.

History

Established in 1968 as a partnership firm under the name Krishna Electrical Industries, with the prime focus of manufacturing cables for the Department of Telecommunications (DoT), the firm was later converted into a public limited company under the abbreviated trade name KEI Industries Limited. In the following years, KEI acquired Matchless Status as a company engaged in the manufacture of stainless steel wires and other electrical wires and cables. In 2010 KEI set foot into the manufacturing of EHV cables (up to 220 kV) in collaboration with Brugg Cables, a century old Swiss company. Since then, KEI has continuously received the Superbrand Award for Industry and Consumer Validation, each year. Also, KEI has been continuously rated for good corporate governance by CARE, since 2007.

Verticals & Clientele

KEI supplies a range of cables to a number of industries such as power, petrochemical, cement, steel, infrastructure telecommunication and fertilizer industries, among others. KEI is a registered vendor for both Indian and overseas EPC contractors like ABB, Siemens, BHEL, Areva, Alstom and McDermott to name a few and is registered as a vendor for more than 200 large Indian companies encompassing almost all industrial sectors.

Services

In addition to electrical cable and wire manufacturing, KEI has diversified its operations and now has a fully established EPC Division to execute turnkey projects for various utilities. KEI offers a comprehensive range of services, including engineering, consultancy and project management, ranging from conceptualising to commissioning for core sectors like Power (including renewable energy), Railways, Refineries, Petrochemicals, Mining, Cement, Steel, etc. It provides end-to-end customer solutions from engineering to designing, supply and installation of products.

Manufacturing

KEI has created a large infrastructure by strategically locating its three manufacturing units over a built-up area of 102260 sq. mtrs. presently however further expansion plans are in pipeline. KEI has three manufacturing units located at Bhiwadi, Chopanki and Silvassa. The current capacity stands at 48,00,000 kg per annum for stainless steel wire division, 5,500 km per annum for HT cables, 35,000 km per annum for LT power cables, 18,000 km per annum for control cables, 10,000 km per annum for instrumentation cables, 6,000 km per annum for rubber cable and 5,00,000 km per annum for house wires/flexible wires. To meet the increased demand for its products emanating from the power, industrial, infrastructure and housing and construction sectors, the company has planned a capacity expansion program for all of its products.

CableGrid
Australia Pty Ltd
P: 0487 007 123 / 1300 780 831 E: info@cablegrid.com.au W: www.cablegrid.com.au

Exports

The company enjoys a presence across almost over 40 countries: Algeria, Mozambique, Korea, Yemen, Australia, Bangladesh, Canada, Congo, Cyprus, Ethiopia, France, Ghana, Germany, Italy, Iran, Iraq, Indonesia, Japan, Kenya, Mauritius, Mexico, Nigeria, New Zealand, Philippines, Qatar, Sri Lanka, Saudi Arabia,singapore, South Africa, Swetzerland, Tanzania, UAE, Uganda, UK. USA, Vietnam, West Indies & Zambia. The company drives almost 20% of its revenue from the overseas market.

KEI Product Range

KEI has been a pioneer in design and manufacture of high-performance cables and wires. Its vast portfolio ,apart from EHV cables up to 220 kV. MV (medium voltage) and HT cables also includes control and instrumentation cables, rubber cables, thermocouple cables, zero halogen cables, braided cables, single and multi core flexible cables, housewire and stainless steel wires. By actively responding to changing customer demands and expectations, the company has expanded its distribution network and strengthened existing industrial product vertical.

KEI's Product Range

- EHV Cables up to 220 kV
- HT Cables up to 33 kV- Dry Cured Process
- LT Power Cables-Copper / Aluminium Conductor PVC, XLPE & EPR
- LT Control Cables-Copper PVC, XLPE & EPR
- Screened / Unscreened Type PVC/PE/EPR/XLPE Instrumentation Cables
- Flexible & Housewires (Single & Multicore)
- Elastomeric (Rubber) Cables
- Railway Signaling Cables
- Fire Survival, Zero Halogen Cables
- Dry Filled Telephone Cables
- Automatic Cables
- Welding Cables
- Submersible Cables / Winding Cables
- Ship Wiring Cable
- Mining Cable-Rubber as per IS 14494 & PVC
- Cables for Offshore Installation
- Cables for Defence
- AB Cables

Unit 1: 919, 920, 922, RIICO Industrial Area, Phase III, Bhiwadi - 301 019, District: Alwar, Rajasthan, INDIA
Unit 2: 99 / 2 / 7, Madhuban Industrial Estate, Rakholi, Silvassa - 396 230, Dadra & Nagar Haveli, INDIA
Unit 3: 280 - 284, Chopanki Industrial Area, Bhiwadi - 301 019, District: Alwar, Rajasthan, INDIA

has been found to conform to the Occupational Health and Safety Management System Standard:

OHSAS 18001:2007

This certificate is valid for the following scope:

MANUFACTURE AND SUPPLY OF ALL TYPE OF CABLES, WIRES & CONDUCTORS VIZ. HT / EHV & LT POWER, CONTROL, INSTRUMENTATION, THERMOCOUPLES, ELASTOMERIC CABLES, WINDING & FLEXIBLE WIRES AND STAINLESS STEEL WIRES FOR WIDE RANGE OF APPLICATIONS

Initial Certification date:
30 June 2011

This Certificate is valid until:
29 June 2017

The audit has been performed under the supervision of:
Balwant Rai
Lead Auditor

DET NORSKE VERITAS 1864

Place and date of Issue:
Chennai, 17 June 2014

for the Certifying Unit:
DNV BUSINESS ASSURANCE INDIA PVT LTD
MUMBAI, INDIA

Sivadasan Madiyath
Management Representative

Lack of fulfilment of conditions as set out in the Certification Agreement & the annexure to this certificate may render this Certificate invalid.

ISSUED BY: DNV BUSINESS ASSURANCE INDIA PVT LTD, 201, 2ND FLOOR, KUMAR PLAZA, KALINA KURLA ROAD, KALINA VILLAGE, SANTACRUZ (E), MUMBAI - 400 029, INDIA

NABL

National Accreditation Board for Testing and Calibration Laboratories

(An Autonomous Body under Department of Science & Technology, Govt. of India)

CERTIFICATE OF ACCREDITATION

KEI INDUSTRIES LTD. (QUALITY ASSURANCE LABORATORY)

has been assessed and accredited in accordance with the standard

ISO/IEC 17025:2005

"General Requirements for the Competence of Testing & Calibration Laboratories"

for its facilities at

SP-919, 920, 922, RIICO Industrial Area, Bhiwadi, Alwar, Rajasthan

in the discipline of

ELECTRICAL TESTING

(To see the scope of accreditation of this laboratory, you may also visit NABL website www.nabl-india.org)

Certificate Number T-1616

Issue Date 18/06/2015

Valid Until 17/06/2017

This certificate remains valid for the Scope of Accreditation as specified in the annexure subject to continued satisfactory compliance to the above standard & the additional requirements of NABL.

Signed for and on behalf of NABL

CERTIFICATION

TO WHOM SOEVER IT MAY CONCERN

This is to advise that we, M/s Brugg Kabel AG, Switzerland have signed a technical collaboration agreement for design, manufacture, testing of XLPE insulated cables 66kV / 110kV / 132kV / 220kV with M/s KEI Industries Ltd. D-90, Okhla Industrial Area, Phase-I, New Delhi 110020 with manufacturing units located at Bhiwadi Unit, SP-919/920, RIICO Industrial Area, Phase-III, Bhiwadi, Dist. Alwar 301019, Rajasthan & Chopanki Unit, Plot-A 260/261/262, Chopanki, Dist. Alwar, Rajasthan 301019.

By virtue of this agreement, the complete manufacturing of High Voltage / Extra High Voltage cables covering voltage grades 66kV / 110 kV / 132kV / 154kV / 220kV shall be done as per Brugg's design and manufacturing systems and the product quality shall meet the required standards as per IEC 60840 / 62067 IEC 62067 as applicable. M/s. KEI Industries Ltd shall manufacture the above voltage class of cables under Licence from M/s BRUGG KABEL AG, Switzerland.

BRUGG KABEL AG's selected Type of Raw materials, designs of products, production procedures, Routine testing, Type testing and Prequalification testing etc. shall be adopted by M/s KEI Industries Ltd. manufacturing plants in India under supervision of BRUGG KABEL AG.

BRUGG KABEL AG will assist M/s KEI Industries Ltd. for preparation and execution of the Tests according to above stated standards.

For HV cable systems project of above voltage categories executed under this agreement, Brugg Kabel AG is prepared to assure back up support for successful operation for offered cable and accessories.

Subject: Vendor Registration

Vendor No.: 394408

We are pleased to inform you that your application, for registration of your Company as a registered supplier with Kahramaa has been accepted. Your Vendor Registration Number is 394408.

You are, therefore, eligible for participating in our public or restricted tenders. Public Tenders will be advertised in any news media as well as in Kahramaa's website (www.km.qa.qa). Tender document can be purchased from Kahramaa as per the advertisement. Enquiries will be faxed and/or emailed to you for our restricted tenders based on the items you have registered with Kahramaa.

However, please be informed that the registration is no guarantee, implied or otherwise, of any future participation in tenders, issuance of enquiry or award of work/supply (i.e. inclusion on a particular tender list or the purchase of your products). We are merely giving your company an equal opportunity to compete with other registered Vendors having the same range of products and services.

Should there be any changes in your company profile (i.e. name, address, contact numbers, inclusion/termination of any agency agreement, addition/deletion of any items etc.) must be notified to Kahramaa immediately.

Note: Kahramaa reserves the right to remove your name from the registered supplier list at its discretion and without notification.

Regards,
Ismail Al Harami
A/Head of Purchasing

OFFICIAL MEMORANDUM

Sub: Vendor approval for 11 kV & 1.1 kV U Cable - Reg

Ref: 1) Technical Committee Meeting held on 14-9-06
2) Firm's Ltr. dated 28/8/06

-/-

The firm namely M/s. KEI Industries Limited, Sy.No.SP-920, RIICO, Industrial Area, phase III, Bhiwadi, Distt. Alwar, Rajasthan-301019 have requested for vendor approval for the 11 kV HT XLPE / PVC UG cables and 1.1 kV LT UG cables of various sizes. The firm have produced CPRI type test certificates for the following sizes of cables.

1. 3 C x 300 Sq.mm. HT cable, 1.1 kV 3.5 x 300 Sq.mm & 600/1000 volts 3 x 240 Sq.mm XLPE HT Power Cables.

The test certificates have been verified and found to be generally in conformity with the IS. The factory is also inspected and is found to have all the necessary infrastructure for manufacturing cables and facilities of the testing facilities to conduct routine and acceptance tests as per IS.

Approval is therefore hereby accorded for M/s. KEI Industries Limited as approved vendors to BESCOM for supply of 11 kV HT UG cable and 1.1 kV LT UG Cable of various sizes for use in MS buildings, Layouts etc., in BESCOM area. The validity of approval is upto Sept-2008. The prospective consumers who purchase the cables shall make preliminary for the cables only. It is to be noted that normally the following sizes of cables are used in BESCOM.

-2-

a) 11 kV HT UG cables of sizes 3 x 95, 3 x 120, 3 x 150 Sq.mm.
b) 1.1 kV LT UG cables of sizes 3 x 120 Sq.mm, 3 x 185 Sq.mm, 3 x 240 Sq.mm and 3 x 400 Sq.mm.

TYPE TEST CERTIFICATE OF COMPLETE TYPE TEST

OBJECT	Three-core power cable
TYPE	[illegible]
Rated voltage (U0/U) / Conductor cross-section	[illegible] / Conductor material / Cr / Insulation material / XLPE
MANUFACTURER	KEI Industries Limited, New Delhi, India
CLIENT	KEI Industries Limited, New Delhi, India
TESTED BY	KEMA HIGH VOLTAGE LABORATORY, Arnhem, the Netherlands
DATE(S) OF TESTS	17 December 2007 until 19 July 2008

The object, constructed in accordance with the description, drawings and photographs incorporated in this Certificate, has been subjected to the series of prototype tests in accordance with

IEC 60502-2

This Type Test Certificate has been issued by KEMA following exclusively the STL Guides.

The results are shown in the record of Proving Tests and the oscillograms attached hereto. The values obtained and the general performance are considered to comply with the above Standard and to justify the ratings assigned by the manufacturer as listed on page 4.

This Certificate applies only to the object tested. The responsibility for conformity of any object having the same designations with that tested rests with the Manufacturer.

This Certificate consists of 35 pages in total.

© Copyright. Only integral reproduction of this certificate is permitted without written permission from KEMA. Electronic copies in any PDF-format or scanned versions of this Certificate may be available and have the status "for information only". The original and hard version of the certificate is the only valid version.

Sub:- Performance report of 3 cores, 3.3 KV grade 120 sq.mm. PVC Cable manufactured by M/s.Kei, Industries Ltd., New Delhi.

Ref. Your letter No:KEL/CMD/HQ(MM)/SC/1814 dt.22.

Dear sir,

With reference to the above, the performance of the cable are given below.

The above cable is being used in pumping circuit as main cable.

The current drawn is 260A to 270A in 550V. It is observed that the armour got rusted after 18 months. After drawing 270A continuously, the cable does not get heated.

Performance is found to be satisfactory.

Yours faithfully,

Area Engineer(MM)

New Delhi - 110 020.

Kind Attn : *Mr. Sanjay Mehra - Asst. Manager (Mktg.)*

Sub : *Enlistment of Supplier for manufacture & supply of Power & Control Cables for Power Projects*

Ref : *Letter No. KEI/433/001/PR/ABB dated 18th Feb.'97*

Dear Sirs,

We thank you for the interest shown by you in associating with us for the implementation of the various Power Projects being set-up / proposed to be set-up by us. We sincerely appreciate the efforts put in by your people in explaining to us the functioning of the various departments / groups in your organisation with regard to above mentioned package.

We are enclosing herewith a write-up on Supplier Classification process which is being adopted for the various packages being tolled by us. As can be seen from the enclosed document, we have kept ISO accreditation as one of the criteria for qualification of the supplier in the category *Level-IV*, i.e. **"Qualified"**. In all our EPC contracts, ISO/ ISO equivalent procedures is demanded by customers. It is just a matter of time that ISO accreditation will be considered as essential for EPC contractor as well as his suppliers. Hence, for you to be a "Qualified " supplier in such EPC projects, it is imperative for you to continue to have ISO accreditation.

While for the present, we have decided to issue tender enquiries to both **'Approved'** as well as **'Qualified'** suppliers, we may add that in future, we are targeting to restrict tender enquiries only to the qualified suppliers. Further, a 'Qualified' supplier stands to gain advantage in a competitive situation, compared to an 'Approved' supplier.

We have taken note of the information given by your organisation and wish to inform you that for the present, we have classified you as a **"Qualified" Supplier for PVC LT Cables & Control Cables**.

As a **'Qualified'** Supplier, we expect you will continue to endeavour attaining a very high standard of operation in your organisation, so as to meet the TQEM threshold for levels III & IV, i.e. Preferred / Partner, as envisaged in our Supplier Classification Process. Accordingly, we would request you to keep us updated on any process related changes / additions being made in your organisation to enable us to do the reassessment / requalification as may become necessary.

Thanking you,

Yours faithfully,

M/s KEI Industries,
D-80, Okhla Industrial Area, Phase-I,
New Delhi-110020

Subject:- Approval for " M/s KEI Industries, manufacturer of Wires from 1.5 sq. mm to 220 kV cable.

Sir,

M/s KEI Industries, New Delhi-20 has approached the Superintending Engineer (Trg.), CDW, AIR, New Delhi for approval of their products with a view to supply/manufacture of their products and supply information presentation before Sr. Officer of CDW (SE/XE/AE/JE) on 01.05.2014 in AIR Training Institute. The following products of M/s KEI Industries, New Delhi have been recommended for approval:-

Sr.No.	Description of Items	Brand/Id products	Referenced to standards
1	LT Cables 0.6/1 kV Cables (upto 630 mm), LT Cables, Instrumentation Cables, Rubber Cables & PVC House Wires & Flexible Cables	KEI	(i) IS:1554 - 1988 (ii) IS:694 (Part-1) & (2) (iii) IS:7098 (Part-1) & (2) (iv) IS:8130 (v) IS:10810 (vi) IS:9968

Professional approval is hereby accordingly, accepted for the above products for use in various units of Civil Direct Wing - All India Radio for a period of 3 years from the date of issue of this letter with the following terms & conditions :-

1. It should be ensured that the products should confirm to relevant BIS/DGS&D specifications. Change, if any should be got approved by competent authority failing which the approval is liable to be cancelled.
2. The approval does not absolve the Executive Engineers, staff from their responsibility in using correct quality products. E.g. only after they are satisfied about the quality and the performance, the products should be used. Mandatory checks about the quality should be carried out as per norms and the records of the same should be maintained as per usual practice in their units.
3. The products shall be used only after satisfying various aspects viz. as under: manufacturer specifications/Bureau Engineering Practicals.
4. Further continuation of the approval of the products will be decided on the basis of the mandatory feedback / performance report submitted by Superintending Engineers/ Sr. Officer during the inspection, failure are detected/reported. The same shall be reported immediately to the respective Superintending Engineer without waiting for the expiry of the period of two years.
5. As intimated, details of the required products e.g. drawings, samples, pricing etc are available on the website given below:

M/S KEI Industries, D-80, Okhla Industrial Area, Phase-I, New Delhi-110020	Telephone No. 011-11-26310844, 26310847 Fax No. 0091 - 11 - 26417720, 26417721 e-mail : market@keiindia.com (Under Whats/ Local Area

6. Civil Construction Wing - All India Radio reserves the right to withdraw the approval at any time without assigning any reason.

This issues with the approval of competent authority.

USE OF ISI MARKED "ISO" BRAND ELECTRICAL CABLES IN DEFENCE WORKS

1. Please refer your letter No. KEI/ADR/03/SES/02 dated 06 Nov 03 and earlier correspondence on the subject.

2. You firm had applied for use of "ISI" brand following types electrical cables in Defence Works: -

(a) PVC insulated (Heavy Duty) Electric cables for working voltages up to and including 1100 V, Insulation type A & C, Sheath type ST 1 & St 2 armoured & unarmoured with copper & aluminium conductor including cables for low temperature applications excluding cables for use in mines, as per IS: 1554 (Part-1)-1988.

(b) PVC insulated cables, singlecore/core, sheathed and unsheathed, for working voltages up to and including 1100V, with copper & aluminium conductor including cables for outdoor and/or low temperature applications, as per IS: 694-1990.

(c) XLPE insulated PVC sheathed cable for working voltages up to and including 1100 V, with aluminium conductor armoured/unarmoured including cable for low temperature conditions not 01 but excluding cables for use in mines, as per IS: 7098/ (P1 1)-1988.

(d) PVC insulated (HS) cables for working voltages up to 3.3 KV, with aluminium/copper conductors sheathed, armoured & unarmoured including cables for use in mines and excluding low temperature conditions. Insulation Type -A and Sheath Type ST-1, as per IS 1554 (Part2)- 1988.

3. It is seen that all above mentioned products are ISI approved & ISI marked and the firm is ISO 9001:2000 Certified Company, hence these products can be incorporated in Defence Works, on merits.

4. You may approach Zonal CEs / lower formations with your manufacturer list accordingly.

Dear Sir,

Subject : Letter of Appreciation

We are pleased to inform you that Haldia Petrochemicals Limited has been certified as ISO 9001:2000 Company by Certifying Agency DNV.

As per ISO norms, vendors working with HPL need to be evaluated for their performance. Accordingly, we send out our most important vendors for the purpose of evaluation and your company is one of them. We are glad to announce that you have been rated as "Excellent" based on your performance for the period 01.04.06 to 30.09.06.

We expect you to maintain this trend and also hope that you will put your best efforts for further improvement in your performance.

Thanking you and looking forward to a fruitful and healthy business relationship between your company and Haldia Petrochemicals Limited in years to come.

Very truly yours,
For Haldia Petrochemicals Limited

Vendor Rating

NIRMA LIMITED

Date 30/05/2007

KEI INDUSTRIES LIMITED
D-90 OKHLA INDUSTRIAL AREA PHASE-I
NEW DELHI

Dear Sir,

Sub: Supplier of materials with NIRMA

Reference to the above subject, we would like to inform you that we have referred your past supplies of materials at our above for a period from date 01/05/2006 to 31/12/2006 and the details of our rating formula and your performance rating are as

QUALITY - 75% (REJECTION WORK) - 25% (C) SERVICE - 10%

ABOVE 95% - EXCELLENT
90% TO 95% - VERY GOOD
75% TO 90% - GOOD
50% TO 75% - NEEDS TO IMPROVE
50% AND BELOW - NEEDS TO MODERATE REVIEW

Quality of materials (Rate of rejection Quote)		70.00	
Timely Delivery	Out	20.00	Status :
General Response	Item	5.00	95%
(a) Work and Status	Total	95.00	Excellent

you obtained the total performance rating less than 50%, it means you have been taken on supplies of the materials in spite of timely delivery & services, as committed by you with us. So we will consider to decide for further business with you.

you obtained the total performance rating lies between 50% and 75%, there is ceiling scope for improvement in quality, timely delivery of material. We will observe your next performance rating marks.

you obtained the total performance rating lies between 75% and 90%, that means you need more efforts to improve the rate timely delivery of material to get the mark above 90% in future.

you obtained the total performance rating lies above 90%, kindly keep it as said by to improve the quality, timely delivery of material to get receive marks in future.

Here, therefore, requested to put your constant efforts for improvement quality, timely delivery and general response as per our standard.

In meantime, if you have obtained the rating 95% and below as per our above performance rating, you may please kindly to visit our procurement office for a detailed discussion with Shri C.J. Patel (DGM Purchase) in the matter, after taking a prior appointment from Mr. Kishore Trivedi, Ext. No. 100, (Contact nos. and address as above).

New Delhi-110020.

Dear Sirs,

Reg.: **Enlistment of M/s "KEI Industries Ltd" for LIC works under Northern Zone**

We are pleased to inform you that the Competent Authority has approved enlistment of your "K.E.I." make for PVC insulated multicore wires, PVC insulated/ unarmored cables, XLPE/PVC insulated aluminium conductor cables under Northern Zone which includes Delhi, Haryana, Punjab, Himachal Pradesh, Rajasthan, Jammu & Kashmir areas.

The above approval has been granted initially for two years to be extended after getting feedback from our engineers. We will be free to test these products in any laboratory as per relevant IS/ Codes. Your enlistment with LIC shall not bind LIC to give you any priority or preference in the case of any enquiry & placement of purchase orders & does not guarantee that all or any of the enquiries for your products would necessarily be sent to you.

Yours faithfully,

Sr.Dy.Engineer

Subject Vendor Registration(This does not cover/include Vendor pre-qualifications or product approval)

We are pleased to inform you that your registration request with Qatar Petroleum has been processed.

Your Materials SAP Vendor Registration Number is: 100007 Expiry Date: 30/09/2011

Please note carefully your registration expiry date and make sure to initiate registration renewal process at least four weeks ahead of the expiry date. Failure to do so may result in removing your company from the QP Materials Supplier list.

Submission of a completed Supplier registration form and any subsequent data requested may result in any approved or pre-qualification status to any supplier. The award of any business to QP will follow established procedures for bidding, evaluation and negotiation.

Your company has been added to the Registered Supplier/Manufacturer database for the following commodities based on QP Materials Department coding system:

Sec. #	Material Group	Commodity
1	0000	Electric Cables & Wires

Should there be any changes in your company profile (e.g. name, address, telephone, fax, contacts) or location of signing agreement, certificates, change of ownership etc) or if you are no longer able to meet the above mentioned commodity groups or any time in the future circumstances change, such that your company is no longer able to comply with the qualification criteria, your company should promptly ensure all required updates are processed on the e-Registration application on QP website.
Email you security credentials, please contact Supplier Helpdesk by email: supplierhelpdesk@qp.com.qa

QP reserves the right to remove your company name from the registered suppliers database at its discretion and without notification.

It is advisable for you to maintain all your information up to date, as we will refer to the information on this e-Registration system for all business related activities.

Thank you for your interest in doing business with Qatar Petroleum.

Original Signed

الموضوع: إشعار بتأهيل منتجات مواد التوزيع

تحية طيبة وبعد،

إشارة إلى طلبكم لتأهيل مصنع KEI Industries الهندي، نود إفادتكم بأنه قد تم تأهيل المصنع المذكور في مجال كابلات الجهد المنخفض (نحاس و ألمنيوم)، كابلات التحكم و كابلات الجهد المتوسط.

هذا وسنتيح لكم الفرصة في المناقصات القادمة حسب المواد الموافق فيها على أن تقدموا شهادات الفحص و اختبار حديثة لهذه المواد من مختبر دولي معتمد لدى الشركة السعودية للكهرباء.

نرجو أن لا يفسر هذا الإشعار على أنه التزام من الشركة السعودية للكهرباء بالشراء، هذا وسنتيح لكم الفرصة للتقديم وسيتم عد العامة و تقييم حسب سياسات و إجراءات الشراء المعمول بها في الشركة.

كما نؤكد على أهمية متابعة الصفحة الرسمية لموقع الشركة الرسمي (www.se.com.sa) رابط المشتريات/المناقصات الإلكترونية لمتابعة ما قد يصدر لكم من مناقصات جديدة.

شاكرين لكم رغبتكم بالتعامل مع الشركة السعودية للكهرباء،

وتقبلوا تحياتي،

مدير إدارة المشتريات
م. محمد الزهراني

Sub : Vendor Registration with MECON

Ref : Your letter No. KEI/MECON/CONTRACTS/11 dated 01-JAN-11

Dear Sirs

Kindly refer to your above mentioned letter. We are pleased to inform you that your company is enlisted in our Approved Vendor List for the following, which is now valid till 06-02-FEB-14. This is subject to terms and earlier letter no. 11/00/2010/SVDEC/0000-1000/1011 dated 3.0.00

ELECTRICAL INSTRUMENT & CONTROL SYSTEM & SPARE EQUIPMENT, POWER DISTRIBUTION EQUIPMENT & CABLES

1 CABLE - FLEXIBLE CABLE (up to 0.6/0.1kV Non-Adaptive cables) (0.1/0.1kV)
2 CABLE - HT POWER CABLE (11kV/33kV)
3 CABLE - MS Armoured Cable (Control/Power)
4 CABLE - LT CONTROL CABLE
5 CABLE - LT POWER CABLE
6 CABLE - INSULATION MATERIAL (LONG BLUE TAPE)
7 CABLE - CONDUCTOR (WIRE)

ERECTION CONTRACTORS :
1 - ELECTRICAL POWER SUPPLIER/FIRM

Please note that the contractor should not be allowed to make any alteration in material or make material any and quality of above mentioned products without prior consent for service records.

Further it is imperative to inform Mecon any change in the product, location of works/subsidiaries, Management, Organisation structure etc. and best feedback on promptly along with relevant documents for our necessary action. Billing which our engineer may minimum you and data provided herewith as all the data is to be calculated. Kindly keep sending your service report every year. Your confirmation shall be considered to be as an acceptance of your existence with MECON.

The offer is valid for one year. Kindly confirm your offer/order acceptance, and also to be the sole distributor/ OEM CONTRACTOR in Delhi. The total value refers to quote for renewal of your registration at least 2 months in advance of expiry of the validity period.

Thanking you,

Yours faithfully

INFORMATION ON EAB (EB - INDIAN NAVY

1. THE CABLES SUPPLIED TO INDIAN NAVY SHIPYARDS (FOR USE ONBOARD /V SHIPS) ARE REQUIRED TO BE STORED FOR CONSIDERABLE PERIOD (SOMETIMES EXTENDING TO 6-8 YEARS) PRIOR ONBOARD USE. FURTHER, THESE CABLES ARE REQUIRED TO PERFORM SATISFACTORILY FOR 20-25 YEARS DEPENDING UPON THE MAIN SYSTEM.

2. AT PRESENT, THE CABLE MANUFACTURERS DO NOT SPECIFY SHELF LIFE/ TOTAL LIFE OF THE CABLE, EVENTHOUGH, IMPORTANT CABLE PARAMETERS LIKE INSULATION RESISTANCE ETC ARE CHECKED BEFORE LAYING OF CABLES. SOME DEGRADATION IN CABLE PROPERTIES DUE TO EXTENDED STORAGE/ IMPROPER STORAGE CONDITIONS CANNOT BE COMPLETELY RULED OUT. IT IS THEREFORE INTENDED TO PROMULGATE GUIDELINES ON STORAGE/ REQUALIFICATION OF CABLES.

3. IN VIEW OF THE ABOVE, IT IS REQUESTED THAT DETAILS/ COMMENTS REGARDING FOLLOWING ARE FORWARDED TO HQ MODEN/GEE BY 25 FEB 11: -

(A) RECOMMENDED MAX SHELF LIFE OF CABLE
(B) EXPECTED TOTAL LIFE OF CABLE
(C) RECOMMENDED STORAGE CONDITIONS
(D) STORAGE PERIOD BEYOND WHICH REQUALIFICATION OF CABLES SHOULD BE UNDERTAKEN
(E) RECOMMENDED PROCEDURE FOR REQUALIFICATION OF CABLES

4. REGARDS.

RENEWAL OF PRODUCT APPROVAL

1. M/s KEI Industries Limited had approached this HQ for renewal of their products i.e. XLPE Cored HT Cable upto & including 33 KVA, LT & Control Cables (Copper/Aluminium Conductor for XLPE/PVC) including Rubber and Instrumentation Cables, House Wires and Flexible Wires (Single Core & Multi Core)' for use in Defence Works.

2. Approval in terms of policy letter No 4320/5/CMPTY(2) (Ord-2) dated 18 Apr 2008 is hereby accorded for use of above mentioned products in Defence Works for a period of Three year ie upto 28 Jan 2017.

3. Further continuation of the products will be decided thereafter, based on the mandatory test back/performance report submitted by Zonal Chief Engineers. In case anyone using the product notices any defect/discrepancy, the same will be reported immediately without waiting for the expiry of the period of three years.

4. The approval does not absolve the executive/supervisory staff from their responsibility for using sound quality product. It is only after they are satisfied about the quality and the performance, the product will be used. Mandatory checks about the quality will be carried out at the factory and the records of the same maintained.

5. A list of the products along with a copy of the literature is enclosed. Further specifications/details of the product like drawings, samples etc can be obtained from the manufacturer at the address given below. -

6. The firm is required to give feedback on sale/supply of approved items to MES Contractors/Formations/Units on six monthly basis as per format given below.

Sl No	Name of Product	Supply to MES Contractor Formation/Unit	Location Station	Date of Supply	Quantity Supplied	Amount (Rs)	Supply Order No	Remarks
(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)

7. The firm is required to submit a minimum of 05 No performance reports from the MES as per the format given opposite at the time of renewal, failing which their case will not be considered for renewal.

Sir,

The subject proposal submitted by you was examined by this office and now the undersigned is pleased to accord approval to the following materials for using in works carried out by Government of Maharashtra W.E.F. the date of issue of this letter.

Name of material : " Wires & Cables "
Place of manufacture : EP-420, Phase-III, RIICO Industrial Area, Bhiwadi, Dist - Alwar(Rajasthan) 301019
Brand Name : "KEI"
Technical Specifications of the Materials :

Sr.No.	Name of Product	Validity
1	PVC insulated Wires & Cables for working voltage upto and including 1100V	Up to 07 August 2017
2	Crosslinked polyethylene insulated PVC sheathed cables - Part 1 for working voltage upto and including 1100V	
3	Crosslinked polyethylene insulated PVC sheathed cables - Part 2 for working voltage from 3.3 kV upto and including 33kV	

Manufactured as per IS No. : For item No. For item No 1) IS : 694-1990, 2) IS : 7098 (Part 1) : 1988 IS : 1554(Part 1) : 1988 For item No 3) IS 7098 (Part 2) : 1985 - IS 1554 (Part 2)
Whether having ISI No. : Yes
License No. : Nil Validity : Nil
Whether covered by Hallmarking Scheme : N.A.
Manufacturing Certificate No. : N.A.
Validity : N.A.
Authority to issue MC : N.A.

The above approval given subject to the performance of the material during this period remains satisfactory. In case of unsatisfactory performance, the approval accorded shall be withdrawn forthwith.

Yours faithfully,

(S.A.Patil)
Chief Engineer (Elec.)

No. 5903/CE(SZ)IV/2014/ [illegible] Dated 6/11/2014

OFFICE MEMORANDUM

Sub: Approval for brands for inclusion in XIT/Tenders.

Chief Engineer, SZ(IV), CPWD, Chennai has approved the following **Wires & Cables** manufactured by **M/s KEI Industries Limited, D-90, Okhla Industrial Area, Phase-I, New Delhi-110020** for use in Electrical Divisions falling under the control of Southern Zone-IV.

S.No.	Description Of Items	Brand of the product
1.	LT/HT Cables	KEI
2.	PVC insulated wires	KEI
3.	Control Cables	KEI

4). The above products are approved for a period of Two Years from the date of issue of this order which may be renewed after two years.

5). SE(E)'s, EE,s & AE,s are required to incorporate the above brands along with the already approved other brands in the list of preferred makes in the NITs approved by them.

6). The approval does not absolve CPWD Engineers concerned from their responsibility of exercising necessary checks like quality, rates & performance of the products while processing / using the same. Short consign / deficiencies of serious nature, if observed while in use at site may be brought to the notice of this office.

Memo no.- [illegible] Dated: 27.02.2015

Subject:- **Empanelment as approved vendor for supply of various size of cables**

Please refer to your request dated 23.01.2015 for empanelment as approved vendor of various size of cables in this regard. It is intimated that your firm M/s KEI Industries Ltd., D-90, Okhla Industrial Area, Phase-1, New Delhi-110020 has been considered for empanelment as approved vendor to supply following Rating/sizes of XLPE cables:-

1. 33kV, 3 Core-from 95 sq mm to 300 sq mm
2. 11kV, 3 Core- from 35 sq mm to 300 sq mm
3. 11kV, 3 Core- 50 sq mm
4. LT cables of sizes 3.5 core 95 sq mm, 3.5 core 120 sq mm, 3.5 core 150sq mm, 3.5 core 185 sq mm, 3.5 core 240 sq mm, 3.5 core 300 sq mm, 4 Core 16 sq mm and 3 core 6 sq mm

However, LT cables of all other sizes are also considering for empanelment subject to condition of submission of valid type test of respective size of LT cable at the time of inspection.

The cables of above mentioned Rating/sizes are empaneled in DHBVN against turnkey work of the Nigam, subject to compliance of the following conditions:-

1. The material supplied should be in line with the approved DTPs / technical specification of the Nigam and any default on this account may lead to your de-empanelment.
2. The supplied material if rejected twice by inspecting officer of the Nigam / third party inspecting agency on account of poor quality / sub standard material would lead to De-empanelment of the firm with immediate effect and without any notice.
3. The inspecting officer should be provided with all T&P, measuring instrument/ testing equipment to undertake quality check of the material. You are further requested to ensure that T&P / testing equipment offered should be certified for its calibration.

However, your empanelment as approved vendor will be with immediate effect and remain valid up to 31.03.2015.

This is for your information please.

Sr.No.	I.S. No.	Product
1.	I.S.694/1990	PVC insulated copper conductor, pvc sheathed/FRLS sheathed cables & Flexibles & Aluminium copper pvc wires.
2.	I.S.7098/Part-I & II /1988	XLPE insulated Armoured/unarmoured & pvc sheathed/FRLS sheathed Aluminium/ copper conductor cables / HT cables ranging from 6.6 KV to 132 KV.
3.	I.S.1554/Part-I/1988	PVC insulated Armoured/unarmoured & pvc sheathed/FRLS sheathed Aluminium/copper conductor cables.

KEI WIRES & CABLES

AFCONS

Dated 09.01.2014

TO WHOMSOEVER IT MAY CONCERN

This is to certify that M/s KEI Industries Limited is our preferred vendor for supply of HT, LT, Instrument and Control, Fire Survival Cables and Special Cables for all our projects.

We have found KEI meeting our requirement of High Quality Standards, Timely Deliveries, Competitive and Resourceful in meeting our urgent requirements.

We have extensively used KEI manufactured cables for 2 major ONGC Projects executed by us i.e. ICP-R & HRD Platforms. The main PO Nos. for these projects are as mentioned below.

0000308_3 of ICP-R
1989-Ind-Pur-HV LV Cable/020 of HRD

The collective values of the cables supplied against PO's referred and various repeat PO's are in excess of INR 250,000,000.00

The cables are in use since last 5 years on ONGC ICP-R Platform and we have found the performance satisfactory.

MANUFACTURE OF EHV CABLES 66 kV TO 220 kV XLPE

KEI Industries Limited is equipped with the Cable Development Technologies to ensure manufacturing of cables up to and including 220 kV. At the Chopanki plant the company is into manufacturing of cables up to 220 kV and the Bhiwadi Plant is capable of manufacturing cables upto 132 kV by Dry Cure / Dry Cooled Process. The 220 kV cables are already Type & PQ tested at FGH Lab (Germany). KEI is equipped and accredited to manufacture cables to all national & international level.

Our Chopanki Plant which commenced its production in 2008 and equipped with state-of-art machines including testing equipments to meet Indian as well as international standards to produce cables and including 220kV.

KEI is equipped to manufacture EHV Cables using most modern machines & equipments at both the plants, received from M/s. Scholz and M/s. Troester (Germany). The plant is endowed with special features: Rotating Catapillers & Tross System for Eccentricity / Ovality Control at Chopanki.

- Single point Triple extrusion process prevents micro contaminants from outside atmosphere
- Dry cure & dry cooling process provides increased electrical stress bearing strength
- Online insulation thickness monitoring & control by Sikora X-ray unit
- Separate rooms with positive pressure for Insulation & semiconducting compound & vacuum feeding / Gravity Feeding at Chopanki for EHV
- Super clean / Tree retardant XLPE compound (Borealis, Dow, Hanwa etc)

We manufacture EHV Cables as per requirements of clients with Poly-Al tape, Corrugated Al / Corrugated Cu / Lead Alloy as well as with world renowned and tried process i.e. continuous extruder.

Some of the advantages of Lead extruded sheathed cables:

- Al Corrugated sheath has following advantages:
  - High Flexibility
  - Lesser Weight
  - Lesser Cost
  - Environment Friendly
- Lead has superior corrosion resistant properties in any environment than Aluminium
- Lead sheathed cables can follow bending with ease
- Lead sheathed cables provide radial water barrier
- Lead sheathed cables are easily solderable/welded
- Life of lead is more than 30 to 40 years
- Lead is very dense & easily fusible
- Shares the fault current with metallic screen in cable
- Chemical resistant behavior

A TYPICAL CROSS SECTION OF EHV CABLES:-

1. Stranded compacted plain Copper/Aluminium Conductor & Millikan Conductor for higher sizes above 1000 sq. mm. (Water tight conductors with water blocking tapes/yarn is an another option)
2. Semi Conducting Tape (Optional)
3. Extruded Semi-Conducting Layer (Conductor Screen)
4. XLPE Insulation (Super Clean Compound / Tree retardant)
5. Extruded Semi-conducting Layer (Insulation Screen)
6. Semi-conducting Water Blocking Tape
7. Extruded Lead Alloy E sheath / Aluminium Corrugated Sheath / Copper Corrugated Sheath / Aluminium Laminated Tapes
8. Semi-conducting Water Swellable Tape
9. Metallic Screen (Copper wires)
10. Counter open Helix with Copper Tape
11. Non-conducting water blocking tape
12. Extruded Inner Sheath
13. Aluminium Wire Armour
14. Outer Sheath
15. Graphite Coating / Exruded Semi-conductive layer

KEI offers complete solution for EHV Cables. Please send your requirements to us and we shall offer you our best solutions. Our Engineering department takes following into account:-

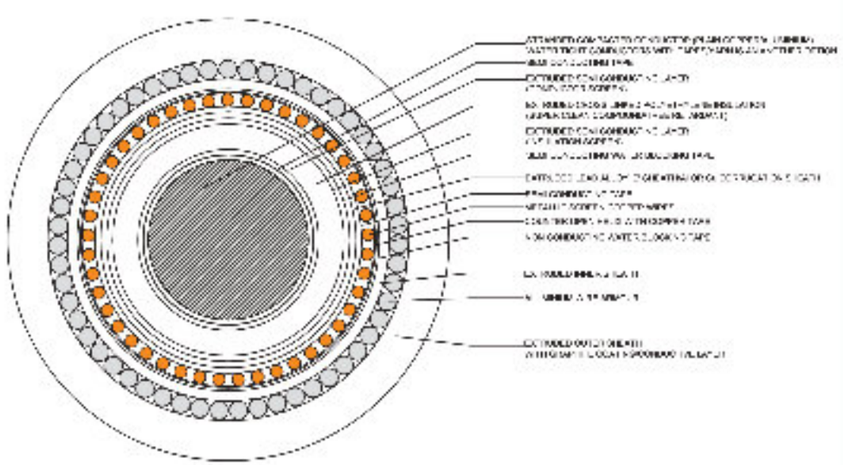
- Survey at site
- Selecting and recommending best routes for installation of the system
- Designing cables
- Manufacture of cables at their own plants (No out sourcing)
- Inspection at our plants
- Dispatch cables to site
- Take up installation of cables at site including termination and jointing etc.
- Final testing after installation & Complete Routine / Acceptance / Type testing In-house / MAH before dispatch from plant
- Charging of system
- Guarantee / warranty for the system and service after installation for many years

FOR CABLE DESIGN WE REQUIRE THE FOLLOWING:-

i. System voltage
ii. Operating frequency
iii. Type of earthing
iv. Fault current level and duration
v. Lightning Impulse level
vi. Normal loading
vii. Cyclic emergency loading with duration
viii. Max. air temperature
ix. Ground thermal resistivity
x. Route length requirements and allowable max. voltage drop per km
xi. Terminations types
xii. Site limitations & installation conditions & Drum handling System / Unloading system for longer length

Based on above and site visit, best cable solution can be designed and offered

A Typical Cross Sectional Drawing of EHV XLPE Cable



KEI INDUSTRIES LTD | EHV . Single core. XLPE Cable

HT CABLES

KEI manufactures HT XLPE cables conforming to National and International Standards at Bhiwadi plant.

KEI has State-of-the-art HT / EHV Cable plant with German technology.

We have two CCV line with a Single point triple extrusion and computerized sophisticated control and monitoring systems. The CCV line at Bhiwadi was imported from Machinenbau Scholz GMBH & Co KG, and CCV line at Chopanki supplied by paul Troester Germany. Both manufacturers are renowned in CCV line technology and have supplied more than 300 lines world over.

HT plant is complete with heavy duty machines for wire drawing and conductor making, laying up, armouring, sheathing and packing.

The process commences with a compacted circular conductor Millikan Conductor being fed from the pay off stands into the extruder on elevated platform. The conductor passes through extruder's crosshead, it is covered first with semiconducting screen layer then the XLPE insulation, followed by the outer semiconducting core screen. This crosshead is specially designed to feed three compounds from three extruders at one point described as Singe-point Triple extrusion.

Thereafter, the extruded core enters and passes through vulcanizing line known as CCV line (Continuous Catenary Vulcanising) and the XLPE insulated core is cured in the process. In CV line inert atmosphere is maintained by the Nitrogen gas which is at high pressure and high temperature.

This process is popularly known as Single-point Triple extrusion CDCC (Completely Dry Cured and Dry Cooled Curing) Process.

Over the cured core a copper screening is provided by lapping of copper tape or for special requirements a layer of copper wires is provided. Core is tested for Partial Discharge and then as per requirement; the cores are laid up with fillers, provided with inner sheath, armoured and sheathed. Sheath can be of PVC, HDPE, FRLS, ZHFR, PCP or CSP compound. Seamless Lead "Alloy E" Sheath is extruded for moisture barrier, necessary for EHV Cables and Submarine Cables before Inner Sheath.

KEI's manufacturing plant and process ensures great XLPE cables for the new age Power sector and industry. Our modern plant takes full advantage of the new generation XLPE compounds which offer fast curing and superior electrical parameters, dimensional control and higher productivity. The Sikora X-Ray limits at both the plants and Rotating Cattapiller & Tross System provides excellent eccentricity and ovality control for higher thickness.

Triple Extrusion and CDCC process ensure contamination free cores. All three layers are bonded and core has least eccentricity and ovality. Insulation itself is free of micro-voids and with negligible moisture content.

To control the manufacturing process the line has been provided with many sophisticated instruments and servo controls all monitored by the computer. Important systems are:

X-Ray Non-touch sensors of SIKORA make for thickness and dimensional control. This system continuously measures the dimensions of insulated cores. Unit has capability to measure multilayer dimensions in all directions and record and analyse the data on line.

CCV tube has a Touch Less Sag control system. This ensures no marks/lines on core unlike older lines.

For EHV Cables conductor pre-heater, core rotation and de-gasification facilities have been provided.

Computerised control system ensures optimum efficiency, fast start up, synchronized operations of compound feeds, three extruders, CCV line gas temperature zones, pay off and take-up.

Nevertheless, KEI XLPE cables compare better than those produced with older plants when checked for Micro-voids, Moisture content, PD levels, dielectric strength.

We have strict quality plan and fully-equipped testing laboratory to ensure cables of best quality are produced as per the design and specifications prescribed. Cables have been type tested as per International Standards.

Inventory and production plans are controlled by BANN ERP system. This ensures reliable and prompt delivery and operational efficiency.

KEI offers a variety of designs to suit different installations viz. Aerial Bunched cables, Water tight construction, Stainless steel armouring for Offshore and Ship installation, etc.

We have many satisfied customers from many countries and diverse industries.

CURRENT RATINGS

KEI Recommendations for Current Ratings:

The Current rating of power cables is defined by the maximum intensity of current (amperes) which can flow continuously through the cable, under permanent loading conditions, without any risk of damaging the cable or deterioration or its electrical properties.

The value given in the tables are valid for one circuit in a three phase system under conditions specified. For grouping cables rating factors must be used.

The current carrying capacities mentioned in KEI technical data are intended as a guide, to assist operating engineers in selecting cables for safety and reliability.

- Max. Conductor Temperature : 90° C
- Ambient Ground Temperature : 30° C
- Ambient Air Temperature : 40° C
- Thermal resistivity of soil : 150°C cm/W
- Depth of laying (to the highest point of the cables laid direct in the ground)
  3.3, 6.6 & 11 kV Cables : 90 cm
  22 and 33 kV Cables : 105 cm
- Max. Conductor Temperature
  for Short Circuit : 250° C

To obtain the maximum current carrying capacity of a cable operating at different conditions from the standard, various rating factors are to be multiplied, as follows :-

I a = K x I s in amperes

I a : Current rating at actual operating conditions (amperes)

I s : Current rating at standard operating conditions (amperes)

K : Rating factor, as applicable

RATING FACTORS

1) For Air And Ground Temperature

a) Rating Factors For Variation In Ambient Air Temperature

Air Temperature, 0°C	25	30	35	40	45	50	55	60
Rating Factor (Maximum Conductor Temperature 90°C)	1.16	1.11	1.06	1.0	0.94	0.88	0.81	0.74

b) Rating Factors For Variation In Ground Temperature For Cables Laid Direct In The Ground

Ground Temperature, 0°C	15	20	25	30	35	40	45	50
Rating Factor (Maximum Conductor Temperature 90°C)	1.12	1.08	1.04	1.0	0.96	0.91	0.87	0.82

2) Rating Factors For Variation In Ground Temperature For Cables In Ducts

Ground Temperature, 0°C	15	20	25	30	35	40	45	50
Rating Factor (Maximum Conductor Temperature 90°C)	1.12	1.08	1.04	1.0	0.96	0.91	0.87	0.82

3) Rating Factors For Depth Of Laying For Cables Laid Direct In The Ground

Depth of Laying	3.3, 6.6 & 11 kV Cables	22 & 33 kV Cables
mm		
900	1.0	-
1050	0.99	1.0
1200	0.97	0.99
1500	0.95	0.97
1800	0.94	0.95
2000	0.93	0.94
2500	0.91	0.92
3000 or above	0.90	0.91

GROUP RATING FACTORS

FOR SINGLE CORE CABLES

A) Group Rating Factors For Three Core Cables, In Horizontal Formation Laid Direct In The Ground

Number of Cables in Group	Spacing between trefoil group centres				
	Touching	200	400	600	800
2	0.79	0.86	0.90	0.92	0.94
3	0.67	0.77	0.82	0.86	0.89
4	0.61	0.72	0.79	0.83	0.87
5	0.56	0.68	0.76	0.81	0.85
6	0.53	0.65	0.74	0.80	0.84
7	0.50	0.63	0.72	0.78	0.83
8	0.48	0.61	0.71	0.78	-
9	0.46	0.60	0.70	0.77	-
10	0.44	0.59	0.69	-	-
11	0.43	0.58	0.69	-	-
12	0.42	0.57	0.68	-	-

B) Cables laid on Racks / Trays in covered trench with removable covers where air circulation is restricted, Trefoils are separated by two cable diameter horizontally and the trays are in tiers having 300 mm distance.

No. Racks / Trays in Tiers	No. of Trefoils in Horizontal Formation		
	1	2	3
1	0.95	0.90	0.88
2	0.90	0.85	0.83
3	0.88	0.83	0.81
6	0.86	0.81	0.79

C) As above B. but cables laid in open air.

1	1	0.98	0.96
2	1	0.95	0.93
3	1	0.94	0.92
6	1	0.93	0.90

FOR MULTI CORE CABLES

A) Cables laid Inside concrete trench with removable covers, on cable trays where air circulation is restricted. The Cables spaced by one cable diameter and trays are in tiers spaced by 300 mm. The clearance Between the wall and the cable is 25 mm.

No. of cables trays in tier	Distance between Trefoils				
	1	2	3	6	9
1	0.95	0.90	0.88	0.85	0.84
2	0.90	0.85	0.83	0.81	0.80
3	0.88	0.83	0.81	0.79	0.78
6	0.86	0.81	0.79	0.77	0.76

B) Cable laid on cable trays exposed to air, the cables spaced by one cable diameter and trays are in tiers spaced by 300 mm. The clearance of the cable from the wall is 25 mm.

No. of cables trays in tier	No. of cables				
	1	2	3	6	9
1	1	0.98	0.80	0.75	0.73
2	1	0.95	0.76	0.71	0.69
3	1	0.94	0.74	0.70	0.68
6	1	0.93	0.72	0.68	0.66

C) Cables laid on cable trays exposed to air, the cables touching and trays are in tiers spaced by 300 mm. The clearance between the wall and the cable is 25 mm.

No. of cables trays	No. of cables per tray				
	1	2	3	6	9
1	1	0.84	0.80	0.75	0.73
2	1	0.80	0.76	0.71	0.69
3	1	0.78	0.74	0.70	0.68
6	1	0.76	0.72	0.68	0.66

D) Cables laid direct in ground in horizontal formation.

No. of cables in Group	Distance of cables			
	Touching	15cm	30cm	45 cm
2	0.79	0.82	0.87	0.90
3	0.69	0.75	0.79	0.83
4	0.62	0.69	0.74	0.79
5	0.58	0.65	0.72	0.76
6	0.54	0.61	0.69	0.75

PVC AND XLPE LT POWER CABLES

KEI INDUSTRIES LIMITED is manufactures LT Power Cables with PVC or XLPE insulation of voltage grade upto 3.3 kV conforming to various Indian and International Standard Specifications. KEI also manufactures other types of cables as listed at the end of this catalogue.

CROSS LINKED POLYETHYLENE (XLPE)

XLPE means cross-linked polyethylene or vulcanized polyethylene. The basic material is low density polyethylene. Polyethylene is a thermoset material consisting of long chain of hydrocarbon molecules. At elevated temperature, these molecules tend to move relative to one another so that the material becomes increasingly deformable and eventually melts at the temperature around 110°C.

By means of process similar to the vulcanization of rubber, the polyethylene molecules can be cross-linked. The process of cross-linking or vulcanization consists of producing chemical bonds at interval between the long molecular chain to give a "ladder" effect which prevents slippage between molecules. As a result of cross-linking the material becomes heat resistant and does not soften at higher temperatures. Further it has better resistance to stress cracking and good resistance to ageing in hot air. With the change of structure there is no adverse effect on electrical properties.

Advantages of KEI XLPE CABLES

- ✓ Dielectric losses are very small
- ✓ Higher current carrying capacity
- ✓ Higher short circuit rating 250°C as against 160 °C for PVC
- ✓ KEI XLPE can retain flexibility down upto - 40°C
- ✓ Jointing and termination is easy
- ✓ Light in weight
- ✓ They are not prone to fatigue damages due to vibrations or loading cycles
- ✓ Has better resistance to most chemicals, oils, acids, etc.
- ✓ Can be installed along cable routes without elevation limitations

Comparison of main properties between PVC and XLPE Insulation

Characteristics	Unit	PVC	XLPE
Permitivity (50 Hz, 20° C)	----	4-6	2.3
Dielectric Loss Factor (50 Hz, 20° C)	----	0.05-0.07	0.0004
Volume Resistivity (Insulation Resistance) (27° C)	Ohm-cm (min)	10^{13}	10^{14}
Maximum Conductor Temperature during continuous operation	Deg C	70	90
Maximum Conductor Temperature during short circuit	Deg C	160	250
Tensile Strength	N/mm^2 (min)	12.5	12.5
% Elongation at break	----	Excellent	Medium
Flexibility at 10 ° C	----	Poor	Good
Resistance to abrasion	----	Medium	Good

RATING FACTORS (PVC)

The current ratings in Table - 1 & 2 based on the normal conditions of installation as described below:

1. Maximum condr. temperature 70° C
2. Ambient air temperature 40° C
3. Ground temperature 30° C
4. Depth of laying (for cable laid directly in ground) 75 cm (1.1 kV)
5. Thermal resistivity of soil 150° C cm/watt
6. Thermal resistivity of cable 650° C cm/watt
7. Max. short-circuit conductor temperature 160° C
8. Max. Ambient Air Temperature 55° C
9. Min Ambient Air temperature -15° C

Installation method and Rating factors are given in tables 1 to 6

Table 1

Rating for variations in ground temperature for cables laid directly in ground and in ducts

Ground temperature (°C)	15	20	25	30	35	40	45	50	55
Rating factor	1.17	1.12	1.06	1.0	0.94	0.87	0.79	0.70	0.60

Table 2

Rating factors for variation in ambient air temperature

Air temperature (°C)	25	30	35	40	45	50	55
Rating factor	1.25	1.16	1.09	1.0	0.90	0.80	0.69

Table 3

Rating factors of groups of twin and multicore cables laid directly in ground in horizontal formation

No. of cables	Rating factor for axial spacing				
	Touching	15 cm	30 cm	45 cm	60 cm
2 cables	0.78	0.81	0.85	0.88	0.90
3 cables	0.68	0.71	0.77	0.81	0.83
4 cables	0.61	0.65	0.72	0.76	0.79
6 cables	0.53	0.58	0.66	0.71	0.76
8 cables	0.48	0.54	0.62	0.67	0.72

Table 4

Rating Factors of groups of Twin and Multicore cables laid directly in Ground in Tier formation

No. of cables	Rating factor for axial spacing				
	Touching	15 cm	30 cm	45 cm	60 cm
4 cables	0.60	0.67	0.73	0.76	0.78
6 cables	0.51	0.57	0.63	0.67	0.69
8 cables	0.45	0.51	0.57	0.59	0.61

Table 5

Rating factors for variation in depth of laying in ground

Depth of laying (cms)	75	90	105	120	150	150 & above
Rating factor upto 25 sq. mm.	1.00	0.99	0.98	0.97	0.96	0.95

Table 6

Group rating factors for cables installed in Ground, separated by more than 7 cms.

No. of cables	1	2	3	4	5	6
Single core D.C. cables & multicore power cables	1.0	0.90	0.80	0.75	0.70	0.65
Single core A.C. cables	1.0	0.80	0.75	0.70	0.65	0.60

RATING FACTORS (XLPE)

The current ratings in Table - 1 & 2 based on the normal conditions of installation as described below:

1. Maximum condr. temperature 90° C
2. Ambient air temperature 40° C
3. Ground temperature 30° C
4. Depth of laying (for cable laid directly in ground) 75 cm (1.1 kV)
5. Thermal resistivity of soil 150° C cm/watt
6. Max-short-circuit conductor temperaure 250° C cm/watt
7. Max Ambient Air temperature 55° C

Installation method and Rating factors are given in tables 1 to 4

Table 1

Rating for variations in ground temperature for cables laid directly in ground and in ducts

Ground temperature °C	15	20	25	30	35	40	45	50
Rating Factor	1.12	1.08	1.03	1.00	0.96	0.91	0.87	0.82

Table 2

Rating Factors for Variation in Ambient Air Temperature

Air temperature °C	25	30	35	40	45	50	55
Rating Factor	1.14	1.10	1.04	1.00	0.95	0.90	0.84

Table 3

Rating Factors of groups of cables laid directly in Ground in Horizontal formation

No. of Cables	Rating factor for Axial spacing			
	Touching	15 cm	30 cm	45 cm
2 cables	0.79	0.82	0.87	0.90
3 cables	0.69	0.75	0.79	0.83
4 cables	0.62	0.69	0.74	0.79
5 cables	0.58	0.65	0.72	0.76
6 cables	0.54	0.61	0.69	0.75

Table 4

Rating Factors for Variation in Depth of laying in Ground

Depth of laying	Size		
	Upto 25 mm^2	25 to 300 mm^2	Above 300 mm^2
75 cm	1.00	1.00	1.00
90 cm	0.99	0.98	0.97
105 cm	0.98	0.97	0.96
120 cm	0.97	0.96	0.95
150 cm	0.96	0.94	0.92
Above 180 cm	0.95	0.93	0.91

Construction

1. Solid/Stranded annealed copper conductor & Tinned/Bare
2. General Purpose PVC-A/HR PVC-C Insulation
3. Cores laid up (filled if needed)
4. FR/FRLS/HR/General Purpose PVC ST-1 or 2 inner sheath
5. Armouring round Galvanized steel wires/strips
6. FR/FRLS/HR/General Purpose PVC ST-1 or 2 outer sheath

Max. Conductor D.C. Resistance at 20°C - Conductor Size :

1.5 sq.mm - 12.1 Ohm/Km (bare), 12.2 Ohm/Km (tinned)
2.5 sq.mm - 7.41 Ohm/Km (bare), 7.56 Ohm/Km (tinned)
* Dimensions specified are with stranded conductor

Approx Reactance at 50 Hz

1.5 sq.mm - 0.126 Ohm/Km, 2.5 sq.mm - 0.119 Ohm/Km

Approx Capacitance at 50 Hz

1.5 sq.mm - 0.14 uF/Km, 2.5 sq.mm - 0.15 uF/Km

Instrumentation Cables

KEI Industries Limited manufactures a wide variety of cables suitable for process instrumentation. In the projects related to power generation & distribution, chemical & fertilizer industries and various other types of engineering industries, the process instrumentation plays a vital role in measurement, supervision and control of the process. Introduction of microprocessor based/computerised instrumentation has demanded stringent quality requirements alongwith special electrical parameters for instrumentation cables. Very low level electrical signals pass between measuring end and display units/controllers which are situated far off. These low level signals are prone to external noise pickups and heavy silenuation during transmission.

All this means that the cables to be used for instrumentation should be designed and manufactured very carefully. KEI, with its meticulous efforts in maintaining quality, stringent in process control during manufacture and the knowledge of cable designing, is proud to say that it is capable of supplying instrumentation cables meeting any Indian/ International standard or a specific requirement desired by project authority. The efforts done by KEI are regarded by acceptance of our quality by the country's prime organisations such as NTPC, PDIL, EIL, BHEL, TATA's, IOCL, L&T, ABB, KRUPP Ind, BPCL, HPCL, ESSAR, SIEMENS, Electricity Boards, Reliance, IOTL, Mukand, Honeywell, etc.

Range of Instrumentation Cables :-

Conductor : 0.4 mm dia (0.126 sq.mm) to 2.5 sq.mm. or higher sizes of electrolytic copper wire, Tinned/untinned, solid/ stranded copper conductors.

Insulation : 70^0 C/85^0 C. Grade PVC, Polyethylene, Halogen Free FRLS Polymeric Compounds.

Elements : Pairs/Triples/Quads, colour coded/number printed ring marked/dual colour extruded.

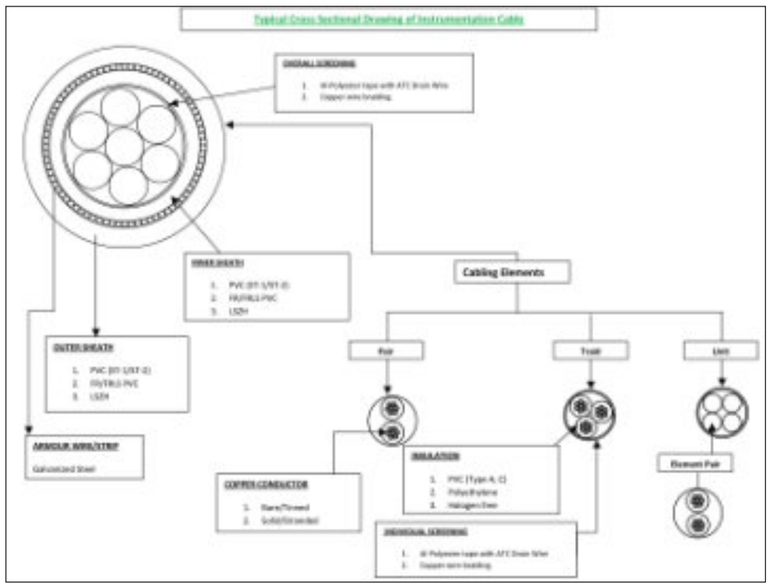
Shields : Aluminimum Polyester tape screen with Copper drain wire or alternately with with Copper wire braiding. Individual element or overall shielding as specified.

Element laying : Concentric formation or unit & group formation as per applicable specification.

Amounting : Galvanised steel wire/strip amount.

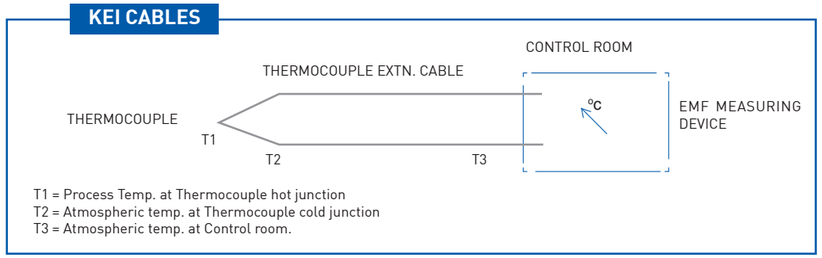
Sheathing : PVC 70^0 C/90^0 C grade, PVC FRLS, ZHFR, CSP, PCP, EVA, etc.

Specification : BS:5308 (1 & 2), iec-189 (1 & 2), VDE 0815, ENI 0181.00 and customers specifications.



Thermocouple Extension/Compensating Cables

These cables can also be termed as instrumentation cables, since they are used for process temperature measurement. The construction is similar to paired instrumentation cable but the conductor material is different. Thermocouples are used in processes to sense temperature and is connected to the pyrometers for indication and control. The thermocouple and pyrometers are electrically conducted by thermocouple extension/compensating cables. The conductors used for these cables are required to have similar thermo-electric (emf) properties as that of the thermocouple used for sensing the temperature. The cables are manufactured as per IS:8784, ANSI-MC 96. 1, B.S., ENI, DIN and customers specification.



Range of Thermocouple Extension/Compensation cables :-

Extension Cables	Conductor Material	
	Positive	Negative
KX (NiCr/Nia)	Chromel	Alumel
JX (Fe/CuNi)	Iron	Constantan
EX (NiCr/CuNi)	Chromel	Constantan
TX (Cu/CuNi)	Copper	Constantan
Compensating Cables		
KX (A)/VX (NiCr/NiAl)	Copper	Constantan
SX/RX (PtRh-Pt)	Copper	Constantan

Rubber Cables

In keeping with the company's commitment to technological advancement, elastomer materials such as Polychloroprene (PCP), Chloro-Sulphoneted Polyethelene (CSP), Nitrile Rubber / PVC blends, Ethylene Propelene Rubber (EPR), Ethylene Vinyle Acetate (EVA) and Silicone have been specially compounded to meet numerous heat oil and fire resisting requirements. In the recent years KEI has also developed special Elastomeric Fire Survival Cables for power, control and instrumentation wiring.

Elastomeric compounds for insulating and sheathing of cables are formulated to meet the requirement of IS 6380, BS 6899, IEC 60502 and other international specification.

GENERAL CONSTRUCTION (Conforming to IS 9968 Part 1 & II)

Conductor – Annealed tinned Copper wires Solid (Class 1), Stranded (Class 2), flexible (Class 5) complying with the requirement of IS 8130

Seperator Tape – Suitable material seperator tape may be applied over the conductor

Insulation – General service elastomer compound Type IE1 of IS 6380
Heat Resisting elastomer compound Type IE2 of IS 6380
Silicone Rubber Type IE 5 of IS 6380

Core Identification – Coloured insulation, Nos. PE tape, Coloured proofed tape, Nos. printing

Fillers – Natural or synthetic fibres or elastomer suitable for the operating temperature and compatible with the insulating material

Sheath – General service sheath Type SE1/SE2 of IS 6380
Heavy Duty Sheath Type SE3/SE4 of IS 6380

Working Temperature of Commonly used Elastomeric Insulating and Sheathing Materials

Material	Max. Cond. Temp. for continuous opertation °C.	Max. Cond. Temp. for short circuit °C.	Min. Working Temp. °C.
Ethylene Propylene Rubber (EPR)	90	250	-50
Polychloroprene (PCP)	70	200	-40
Chlorosupphonated Polyethylene (CSP)	90	200	-35
Silicone Rubber	150/180	350	55
Chloropropylene Ethylene (CPE)	90	250	-30
Styrene Butaolence Rubber	60	200	-55
NBR PVC	90	250	-30

120	0.164	370	391
150	0.132	425	450
185	0.108	485	514

Note:

1) This table covers current rating of flexible trailing cable armoured / unarmoured conforming to IS:9968 I & II, IS 14494, VDE 0250 , NCB & other equivalent international specifications for flexible cables.

2) The rating is given above are based on ambient temp.30°C for higher temp. please refer to the following table of correction factors.

Temp.°C	EPR
25	1.05
30	1.00
35	0.93
40	0.86
45	0.80
50	0.72
55	0.63
60	0.54
70	0.31

3) Rating factor for 'MONOSPIRAL' reeling drum winding duty is 0.85 .

4) For reeling-unreeling operation rating factors are as follows :

No. of Times	1	2	3	4
Derating Factors	0.76	0.58	0.47	0.40

*Current rating for higher sizes upon request.

Rubber Cables

Elaslomenc Cables Range	Application
Cables up to 11 kV	Machine Trailling. Mining, Power
Flexible Trailing Cables	Reeling unreeling, Trailing. Festooning. Mobile Machines Cranes, Coal Handling and Conveyors
Mining Cables	FT or Pliable Armoured or Landline type as per IS 14494, NCB. SABS specs tor UG, Open cast Coal or other mines and mining machines
Thermal Power Plants	For coal handling plants, flexible power and control application
Cables for Steel Plants	Flexible and high temp withstanding cables tor tumace. melting shops, material handling
Wind Energy	Flexible cables lor power and control lor Wind Mill generator connection
Fire Survival Cables	Fire Survival lor 3 Hrs or 20 Min
Ship Wiring	As per IEC specs and Naval specs DGS of DEFSTAN, NES
Offshore and Onshore	For platforms and Ring as per IEC. BS and NEK Specs
Shore Supply & Generator Cables	For charging of ship batteries and supply from mobile generators
Motor Coil Leads	Elaslomeric and Silicon as per IS. BS, or OEM Specs
High Temp Cables	Silicon insulated, glass fiber braided or unbraided
Pump Cables	For water, submersible and sewerage pumps
Cables for Railway	Coach wiring, Metro railway
Wire	HFFR Low toxic emission under fire
Panel Wiring	For flexible, high power high temp zone, polluted or moist atmospheres
Battery Cables	For High current and long life
Low Temperature installations	Suitable tor subzero temp installations and operations
Misc Applications	outdoor high mast lighting site power supply, while goods, oil or chemical resistant
Type	Power and Control cables up to 61 Crores Instrumentation Pairs 30 pairs, triads, quad Wires, flat cables
Voltage Grades	11 kV, 6.6 kV, 3.3 kV, 1.1 kV, 750 V, 250 V, 110 V, 60 V
Conductor Range	0.5 to 630 sq. mm
Polymers Processed Compounds	EPR, EPDM, PCP, CSP, CPE, SILICONE, EVA HALOGEN FREE AND FIRE RESISTANT NONTOXIC COMPOUNDS
Braiding Offered	ATC, Gl wire braid. Synthetics or Textile Yarn. Glass Fiber
Armouring	Pliable armour or Steel / Copper Wires / Stainless steel

Conductor Data

Conductor Technical data for Single Core and Multicore cables confirming to IS: 8130 (Stranded-Class-2) Aluminium Conductor or Annealed Copper conductor, compacted circular or shaped

Nominal Size of Conductor	Minimum no of wires				Max DC Resistance at 20°C		Approx. AC Resistance at 70°C		Approx. AC Resistance at 85°C		Approx. AC Resistance at 90°C

1000	143.0	94.0	115.0	76.0	104.0	69.0

Rating for any other duration :

1) Max. Initial Conductor Temperature during operation :

XLPE	PVC-A	PVC-C
90°C	70°C	85°C

1) Max. Final Conductor Temperature during short circuit :

XLPE	PVC-A	PVC-C
250°C	160°C	160°C

Formula relating short Circuit Rating with t second duration

Where, A = Area of cross section
Isc = Short circuit rating for 1 second
t = duration in seconds.
k = a constant depends on Conductor & Insulation material
k = 0.094 for Al conductor & XLPE Insulation
k = 0.143 for Cu conductor & XLPE Insulation
k = 0.076 for Al conductor & PVC-A Insulation
k = 0.115 for Cu conductor & PVC-A Insulation
k = 0.069 for Al conductor & PVC-C Insulation
k = 0.104 for Cu conductor & PVC-C Insulation

Comparative Current Rating of 650/1100 Volts multicore heavy duty PVC Insulated Cable & XLPE Insulated Cables, 3, 3.5 & 4 cores Unarmoured/Armoured PVC Sheathed cables with Aluminium Conductor.

Handling & Storage

Handling (Unloading at Site)

On receipt of the cable drum, visual inspection of the drum should be made. While unloading the drums from the lorry/trailer, a crane or suitable derrick system with chain pulley arrangement should be used and the drums carefully lifted and deposited on the ground. When lifting the drums with a crane, it is recommended that the lagging should be kept in place to prevent the flanges from crushing on to the cable. If the crane is not availabe, a ramp should be prepared with approximate inclination of 1:3 or 1:4. The cable drum should be rolled over the ramp by means of ropes and winches. Under no circumstances should the drums be dropped on the ground as the shock may cause serious damage to the inner layer of the cables. Cables should not be dragged along the earth surface.

Cable ends should always be sealed by means of suitable end sealing materials to prevent miniaturization of cores and armour

Drums should be rolled in the direction of arrows marked on the drums.

Storage

The site chosen for the storage for the cable drums should be dry and covered to prevent exposure to climatic conditions and wear & tear of wooden drum. It should be preferably on a concrete / consolidated surface which will not cause the drum to sink and thus lead to flange and extremely difficult in moving the drums. The drum should be stored in such a manner as to leave sufficient space between them for air circulation. It is desirable for the drums to stand on battens placed directly under flanges. In no case shall the drums be stored flat i.e. with flanges horixontal.

Minimum Permissible Bending Radius

While installing the cables, the following minimum bending radius should be observed in order so that the cables, especially insulation, may not undergo damage. Whenever possible larger bending radius should be used.

VOLTAGE RATING	PVC & XLPE Cables	
kV	SIngle Core	Multicore
Upto 1.1	15D	15D
Above 1.1 to 11	15D	15D
Above 22 & 33 kV	20D	20D

Where D is outer diameter of cable

Cable Selection Guide

Materials Comparison Chart

KEI offer a wide range of materials for the purpose of insulation and sheathing. KEI is pitting their effort to design the cables by careful balancing the properties of selected materials in combination with a view to meet the specific environmental and installation conditions.

Any material does not possess universal properties which is suitable for all conditions. This will be evident from the comparison chart.

Although this chart does not provide the detailed information of all the materials and combinations of them with every pertinent characteristics, it serves as a guideline of information which a cable specialist requires to ensure most appropriate design to meet specific needs.

Please do consult our experts from the Technical Services Department of KEI Industries Limited, Cable Division.
